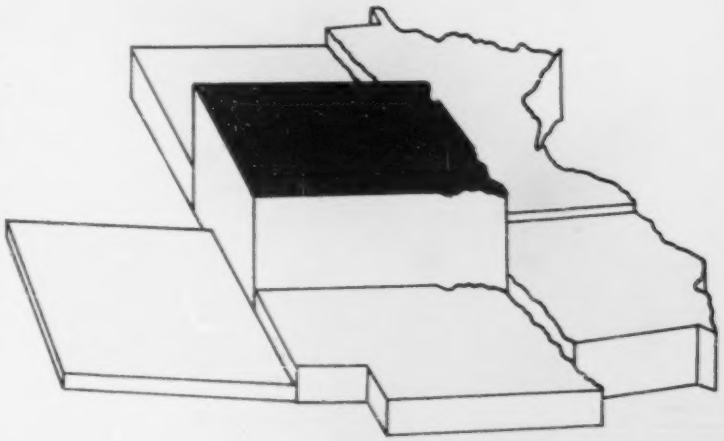
SOUTH DAKOTA
Data Supplement

November, 1985
Vol.II, No.5



Published by the Business Research Bureau, The University of South Dakota

★SOUTH DAKOTA'S BIMONTHLY RETAIL SALES UP 2% FOR JULY-AUGUST

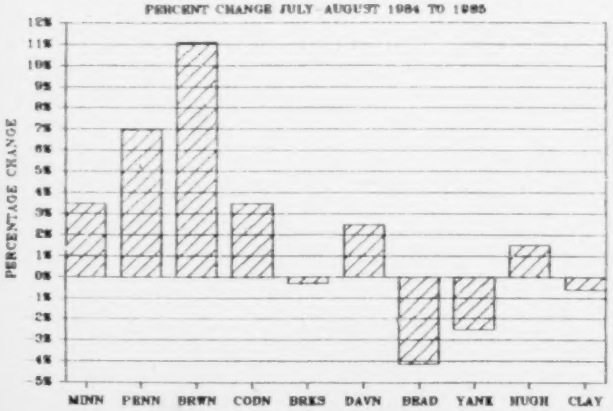
★GROWTH IN TWO LARGEST COUNTIES AVERAGED 5% FOR BIMONTHLY WITH THE NEXT EIGHT FOLLOWING CLOSE AT 3% GROWTH RATE

★OTHER COUNTIES' PERFORMANCE NEGATIVE RELATIVE TO SAME PERIOD LAST YEAR

South Dakota retail sales continue to increase. The growth rate for July-August 1985 over the same period in 1984 was 2.0%. The state lagged the national growth rate of 6.2% for the bimonthly period by 4.2 percentage points. However, there is a major inconsistency in the data. South Dakota's retail sales data does not include automobile sales. South Dakota has a registration fee on auto sales in lieu of sales tax. Much of the national growth in retail sales during this bimonthly period is attributed to the automobile sales encouraged by manufacture-sponsored low interest rates.

Pennington county continues to be a strong performer in the July-August bimonthly, but certainly not the strongest member of the counties of the top ten cities. Brown county had increased retail sales of over 11%. (see Graph) Minnehaha's performance is about one-half that of Pennington for the second bimonthly in a row. If the counties in the graph were arrayed by volume of retail sales in place of population, Brookings and Davison counties would exchange positions and the top five counties in terms of retail sales would have shown increases and all but Hughes county in the bottom five would have experienced decreases.

SELECTED TAXABLE RETAIL SALES
PERCENT CHANGE JULY-AUGUST 1984 TO 1985



BIMONTHLY PERIODS	SEPT-OCT 1984	NOV-DEC 1984	JAN-FEB 1985	MAR-APR 1985	MAY-JUN 1985	JUL-AUG 1985
NATIONAL RETAIL SALES (1)(2)	8.4%	7.7%	5.3%	7.2%	5.3%	7.7%
NATIONAL INDEX OF CONSUMER SENTIMENT (2)(3)	100.9	95.7	96.0	93.7	91.8	94.0
SO. DAK. RETAIL SALES (4)	6.4%	3.2%	3.5%	4.3%	1.3%	2.0%
COUNTIES OF LARGEST TEN CITIES (4)(5)	7.7%	4.6%	4.2%	5.4%	2.9%	4.3%
ALL OTHER COUNTIES (4)(5)	3.5%	.0%	2.0%	1.6%	-2.3%	-3.0%

(continued from page 1)

Brown and Pennington counties are performing well for different reasons. Pennington's strengths appear more attached to construction with strong performance in the areas of building materials, furniture and real estate. Brown county wasn't performing that well in those areas but was stronger in the areas of general merchandise, eating and drinking, and services of automotive dealers. Both showed strength in food store sales and apparel and accessory sales.

National retail sales for the September-October bimonthly period increased at the rate of 6.2 pecent. However, it is reported that the favorable interest rate on auto loans and car sales themselves are "off" in October. The national index of consumer sentiment for the period decreased from 94.0 in July to 92.1 in September.

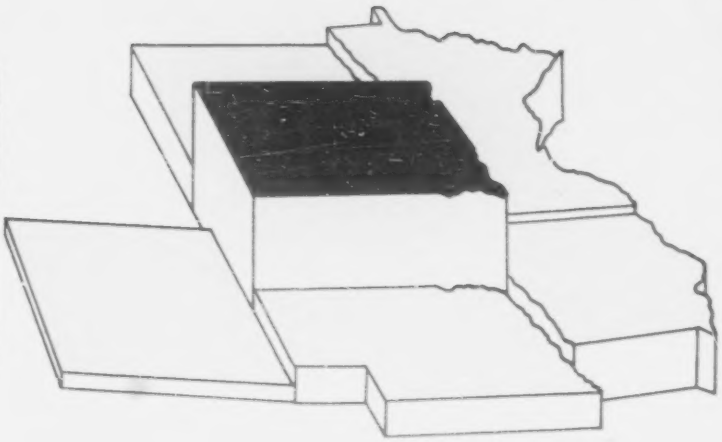
SOUTH DAKOTA
Data Supplement

January, 1986
Vol.II, No. 6



Published by the Business Research Bureau, The University of South Dakota

★SOUTH DAKOTA'S SEPTEMBER-OCTOBER BIMONTHLY RETAIL SALES DOWN 1.6% FROM SAME PERIOD LAST YEAR.

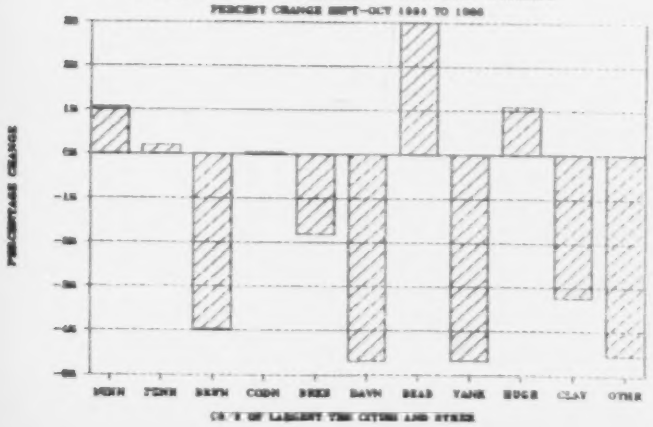
★GROWTH IN TWO LARGEST COUNTIES, MINNEHAHA AND PENNINGTON, IS WEAK BUT POSITIVE.

★NEXT EIGHT COUNTIES AND RURAL COUNTIES PERFORMANCE NEGATIVE RELATIVE TO SAME PERIOD LAST YEAR.

Retail sales performance in the September-October bimonthly reporting period for the state is negative. This bimonthly is the first time since bimonthly remittances started in 1983 that the state's overall performance showed a decline when compared to the same period the year before. The top two counties did have growth of 1.1% and .2%. Six of the next eight counties recorded declines. The remainder of the state, counties other than the counties of the top ten cities, recorded their third straight bimonthly decrease and the percentage of decline has become more sizable in each period. (see Table)

SELECTED TAXABLE RETAIL SALES

PERCENT CHANGE SEPT-OCT 1984 TO 1985



CITY OF LARGEST TEN CITIES AND RYRKS

The retail sales stagnation in Pennington County appears general. Both the tangible personal property sales and the service areas have slowed. Minnehaha differs from Pennington in that the taxable sales reported in services continue to perform briskly. Minnehaha's sales of business services, automotive services, motion picture admission, amusements and recreation services all showed outstanding performance during this period while Pennington County had decreased taxable sales in each of these areas. Grocery store and general sales were off in both counties

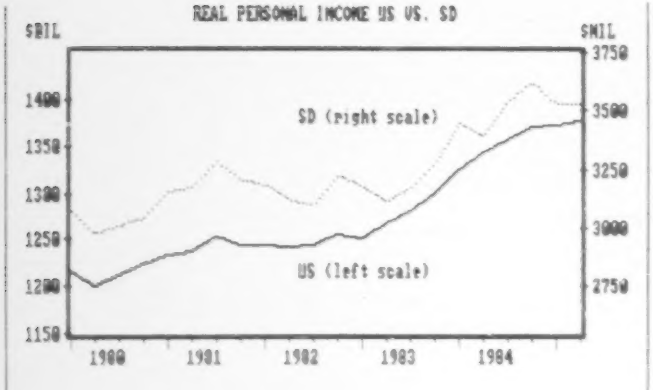
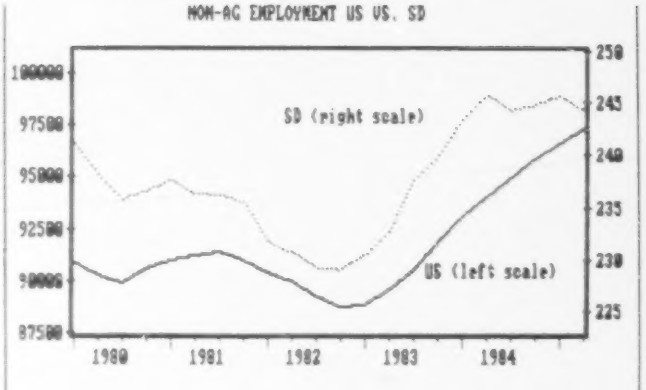
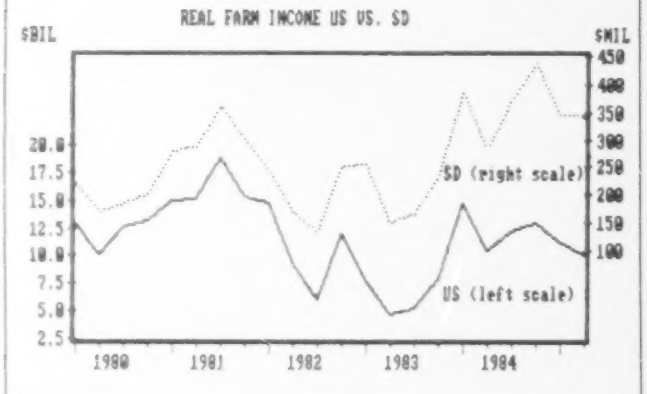
THE ECONOMY: UNITED STATES AND SOUTH DAKOTA COMPARISONS







In the four graphs shown above it is apparent that the U.S. and South Dakota have moved in a very similar pattern since 1980. The peaks and troughs for most of the variables have approximately the same time. However, both economies have experienced a slowdown since 1984. Examination of real personal income shows that the South Dakota economy is down slightly from 1984 levels, while the U.S. economy is not down, but has slowed significantly. A similar pattern is also apparent for non-ag employment where South Dakota non-ag employment has been flat since 1984, while U.S. non-ag employment has continued to expand. Turning to the unemployment rate, the South Dakota economy has experienced an upturn since late 1984, while the U.S. unemployment rate has remained relatively flat. The pattern for real farm income is slightly different with a very modest uptrend in South Dakota since early 1984 and a slight downtrend for the U.S. Overall, it appears that the South Dakota economy has not kept pace with the U.S. economy since 1984.

(continued from page 1)

The next eight counties of the top ten showed decline in the building materials segment for a year-to-date decline of 6.7%. The counties other than the top ten experienced a decrease of 6.5% in that sector this bimonthly for a year-to-date decrease of 7.6%. Food store sales were off 4.6% for the next eight counties and 3.1% for the remainder of the state. As was the case for the top two counties, the next eight and the other counties were stronger in entertainment and recreation. Tangible personal property sales were off and services were improved for both the next eight and the other counties.

The national retail sales increased at the rate of 5.3% in the November-December bimonthly period. The national index of consumer sentiment for the period increased from 92.1 in May to 90.9 in November.

SOUTH DAKOTA
Data Supplement

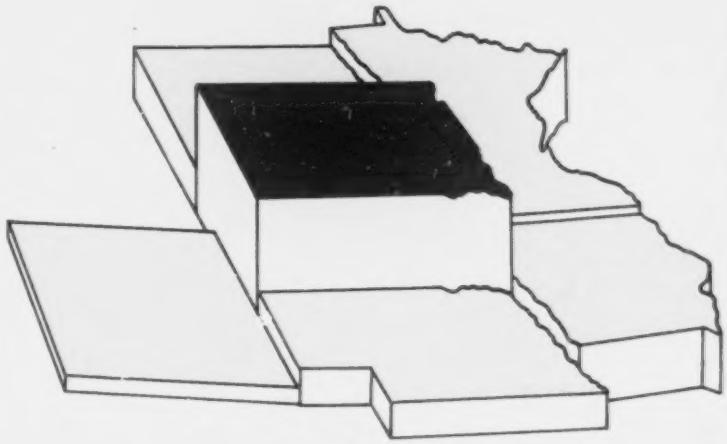
March, 1986
Vol.III, No. 1



Published by Business Research Bureau, The University of South Dakota

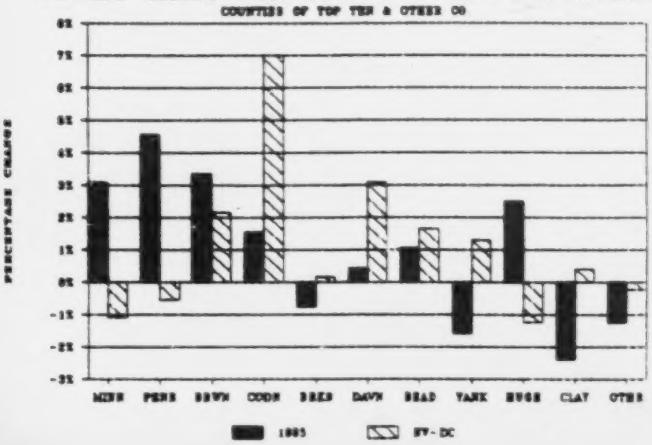
★THE STATE'S 1985 CHRISTMAS BIMONTHLY RETAIL SALES ONLY SLIGHTLY HIGHER THAN SAME PERIOD IN 1984.

★GROWTH IN TWO LARGEST COUNTIES, MINNEHAHA AND PENNINGTON, IS NEGATIVE.

★NEXT EIGHT COUNTIES ARE UP 2.3% AND OTHER COUNTIES' PERFORMANCE IS DOWN 0.2% RELATIVE TO SAME PERIOD LAST YEAR.

Retail sales performance for the state in the November-December bimonthly reporting period showed a slight gain with a growth rate of 0.2%. Neither of the two largest counties contributed to the bimonthly gain; both Minnehaha and Pennington counties recorded declines in retail sales for this Christmas reporting period. Minnehaha registered a decline of 1.1% in sales and Pennington county's retail sales were 0.5% below the same period in 1984. The retail sales strength for the period was in the next eight counties of the top ten. Of the eight, only Hughes county had a decrease for the period. Codington county's increase was the most outstanding. (see Graph)

RETAIL SALES FOR 1985 & NV-DC BIMONTHLY



The Christmas season did not perform well in the area of apparel and accessories. General merchandise stores faired poorly in Minnehaha and Pennington counties but registered gains in this sector in the next eight counties and the rest of the state. Business was off for the eating and drinking establishments statewide. Furniture sales were up in Minnehaha county, flat in Pennington and down in the next eight and other counties. The purchase of building materials was down from the 1984 sales level statewide. Overall, receipts for services are outperforming the sales of tangible personal property.

National retail sales increased at the rate of 5.2% in the January-February bimonthly period which is .1% below the gain in the November-December bimonthly period. The national index of consumer sentiment increased from 90.9 in November of 1985 to 95.6 in January of this year. The index is at its highest point since January of 1985.

SOUTH DAKOTA
Data Supplement

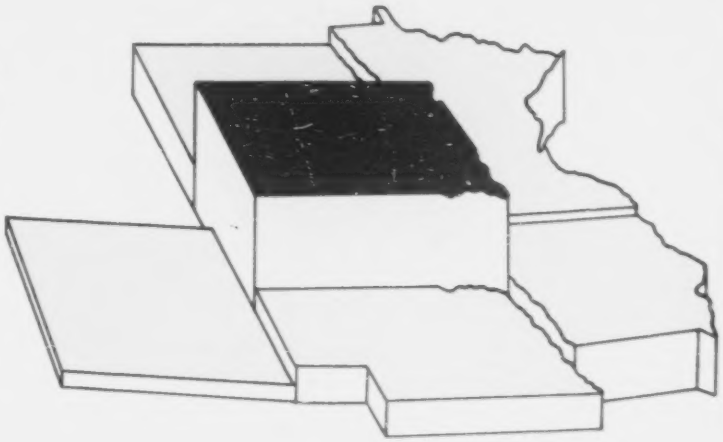
May, 1986
Vol.III, No.2



Published by Business Research Bureau, The University of South Dakota

* THE STATE'S 1986 JANUARY-FEBRUARY RETAIL SALES DOWN SLIGHTLY FROM SAME PERIOD IN 1985.
* RETAIL SALES PERFORMANCE IN MINNEHAHA AND PENNINGTON IS POSITIVE.
* THE NEXT EIGHT AND OTHER COUNTIES' SALES PERFORMANCE ARE BOTH NEGATIVE.

Retail sales were down slightly in the first 1986 bimonthly. The state's January-February performance was down .1% compared to the same period in 1985. This near flat performance is the result of continued weakness in the sale of tangible personal property and less brisk sales in the service sectors.

The top ten counties averaged an increase of .6%. The top two and the next eight counties had increases and declines of approximately 1.5% and .8%, respectively. Five of the next eight had declines in sales. Beadle and Clay counties were the two of the eight that had increases. The top ten counties ' strength continues to come from the service sector with the sale of tangible personal property declining. Construction continues its lackluster performance in the top ten counties. The sale of building materials continues to dampen retail sales with decreases of over 17% in the top ten counties.

The other counties' retail sales declined 1.5% this reporting-period. Growth in the sale of services in the smaller communities was approximately equal to that of the larger communities. However, tangible personal property retail sales declined and more than offset the increased sale of services. The result was an overall decline. Sale of building materials for this group was nearly flat for the period.

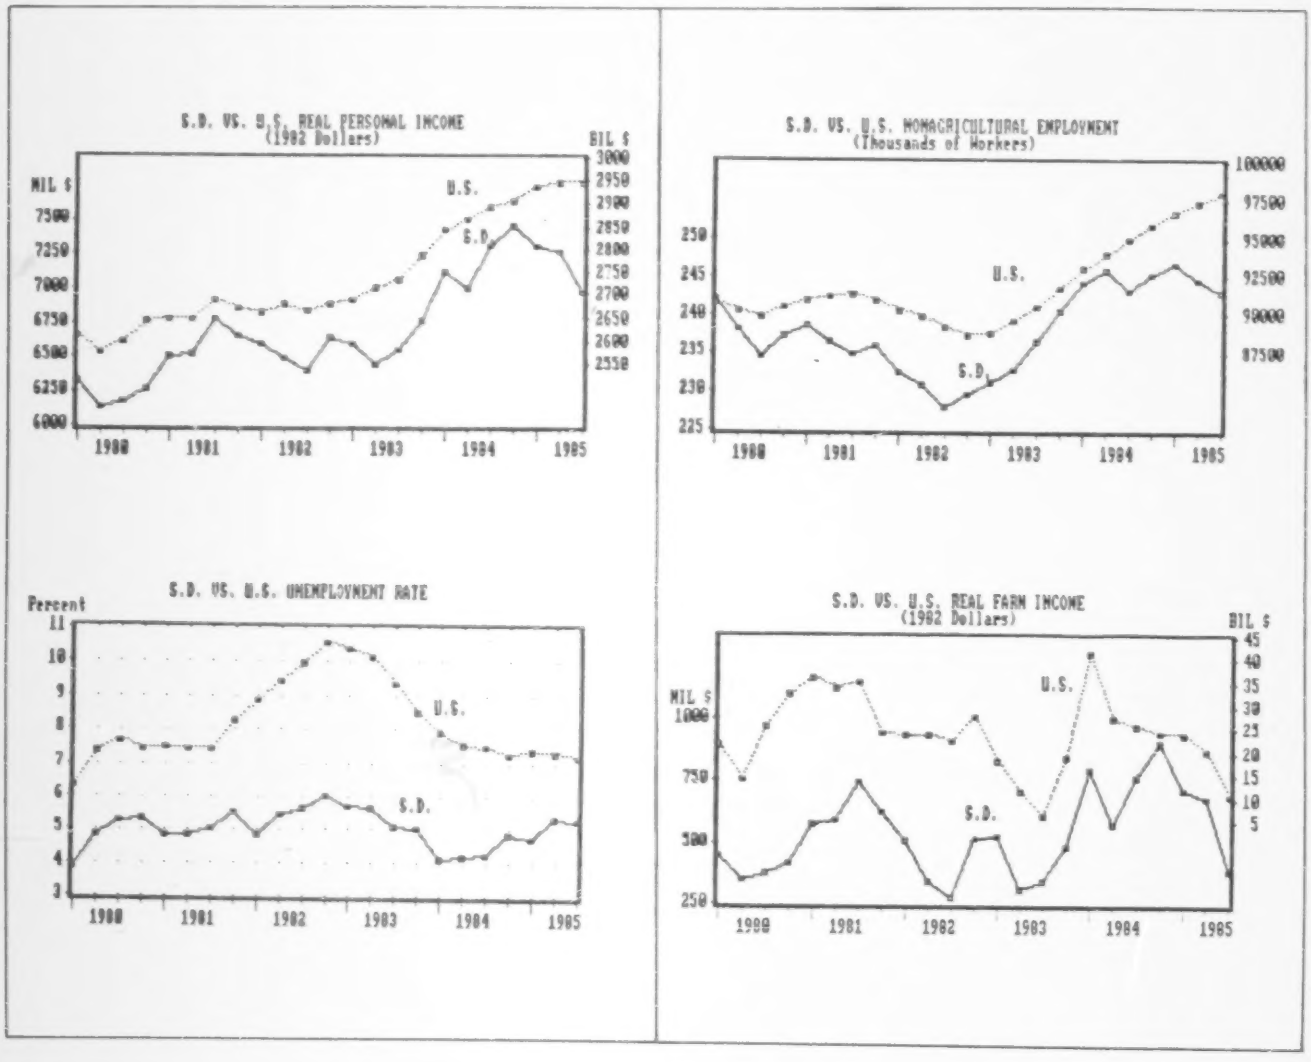
THE ECONOMY: UNITED STATES AND SOUTH DAKOTA COMPARISONS

Ralph J. Brown



The four graphs shown above provide comparisons for South Dakota and U.S. key economic variables. While most of the variables tend to move together over time, there are certain differences of interest. Examination of real personal income shows that while the U.S. economy has expanded in 1984 and 1985, the South Dakota economy has declined since late 1984. This same pattern is apparent for nonagricultural employment. Examination of the unemployment rate shows that while the U.S. rate has trended down since early 1984, it has increased by more than one percent in South Dakota. The real farm income graph shows decline in both U.S. and South Dakota real farm income. However, since farm income is more important in the South Dakota economy, its downtrend has had a greater negative impact on the overall South Dakota economy.

---

continued from page 1

Movies, amusement and recreation performed well at all three levels of the county groupings. Interestingly, the eating and drinking establishments are not sharing in the entertainment sector's good fortune. Eating and drinking establishments' performance is nearly flat for all three groupings.

National retail sales increased at the rate of 2.9% in the March-April bimonthly which is 2.6 percentage points below the gain in the January-February bimonthly period. The national index of consumer sentiment decreased from 95.6 in January of 1986 to 95.1 in March of this year.

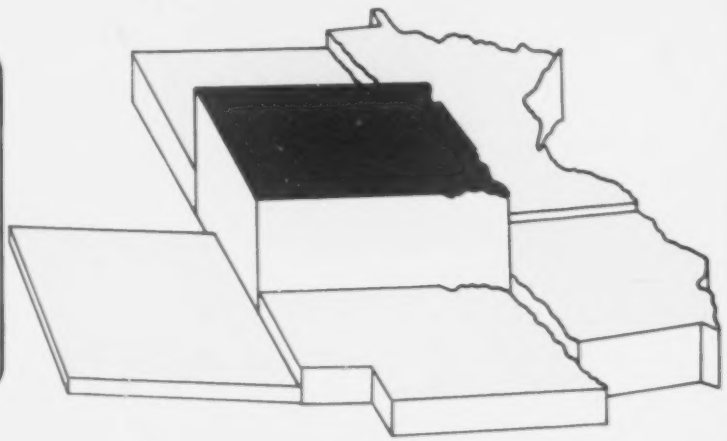
SOUTH DAKOTA Data Supplement

July, 1986
Vol. III, No. 3



Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA'S BIMONTHLY RETAIL SALES LACKLUSTER IN THE MARCH-APRIL BIMONTHLY, BUT ARE UP 1.4%.
* GROWTH IN TWO LARGEST COUNTIES AVERAGED 3.6% FOR BIMONTLY WITH THE NEXT EIGHT FOLLOWING AT 1.9% GROWTH RATE.
* OTHER COUNTIES' PERFORMANCE NEGATIVE RELATIVE TO SAME PERIOD LAST YEAR - RECORD ONE FULL YEAR OF DECLINE.

The state's retail sales performance lags the nation's performance, but the state's performance improved while the nation's retail sales performance weakened in the March-April bimonthly. The state's growth rate for March-April 1986 over the same period in 1985 was 1.4% - up from a decrease in the preceding bimonthly. The state lagged the national growth rate of 3.3% for the bimonthly period by 1.9 percentage points.

Of the top ten counties, Pennington county was the number two performer in this reporting period with increased retail sales of 4.8%. Beadle county was the best performer of the top ten with a growth rate of 10.5%. Minnehaha's performance ranked third for the period at 2.8%. Hughes was the only county of the top ten that recorded a decline this bimonthly.

Pennington's strength appears to be in the sale of goods as opposed to services. Pennington demonstrated performance in the areas of building materials and food sales. Minnehaha retailers experienced decreased activity in both areas. Clothing and apparel sales were lower in both counties than in the preceding year but the sales decline was larger for Minnehaha retailers.

The next eight counties of the top ten had growth in the building materials area and the furniture sector. General merchandise was down and unlike the top two, apparel and accessory sales were up.

The other counties experienced growth in the building materials sector, but declines prevailed in the other retail sale of goods. Services were up for this group but were not substantial enough to offset the decline in the sale of goods.

National retail sales for the May-June bimonthly period increased at the rate of 4.2 percent. The national index of consumer sentiment for the period decreased from 95.1 in March to 94.8 in May.

BIMONTHLY PERIODS	MAY-JUN 1985	JUL-AUG 1985	SEP-OCT 1985	NOV-DEC 1985	JAN-FEB 1986	MAR-APR 1986

A COMPARISON OF THE SOUTH DAKOTA AND UNITED STATES' ECONOMIES

Brian J. Brown

These four graphs show the patterns of the SD economy in relation to the US economy since 1980. For the most part, both economies have followed similar courses by rising and falling at approximately the same time. Since 1985, the SD economy has experienced a slowdown, while the US economy has remained relatively stable. An exception to this lies in the case of real farm income, which has declined in both economies from 1984 levels, although it has begun an upward trend since the third quarter of 1985. Also, SD non-ag employment has decreased since the beginning of 1985, while US non-ag employment continues to expand. Meanwhile, SD real personal income has declined from 1984 levels although it also has begun an upturn since the third quarter of 1985. The third graph shows that the SD unemployment rate has increased up to the fourth quarter of 1985. In general, it appears that the SD economy has moved at a much slower pace than the US economy throughout 1985.

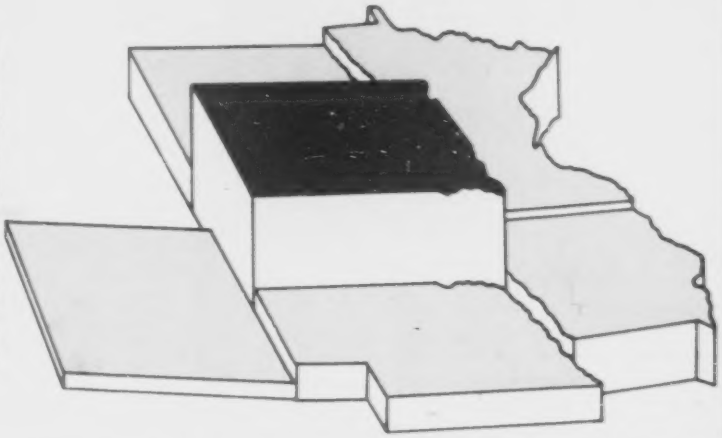
SOUTH DAKOTA Data Supplement

September, 1986
Vol. III, No. 4



Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA'S BIMONTHLY RETAIL SALES PERFORMANCE FOR MAY-JUNE BI- MONTHLY EXCEEDS NATIONAL GROWTH RATE
* GROWTH IN TWO LARGEST COUNTIES, MINNEHAHA AND PENNINGTON, IS 5.5% WITH THE NEXT EIGHT OF TOP TEN RECORDING GROWTH OF 4.6%
* RURAL COUNTIES PERFORMANCE EXCEEDS REMAINDER OF STATE AND THE NATION - IT ENDS A LONG STRING OF NEGATIVE PERFORMANCE FIGURES

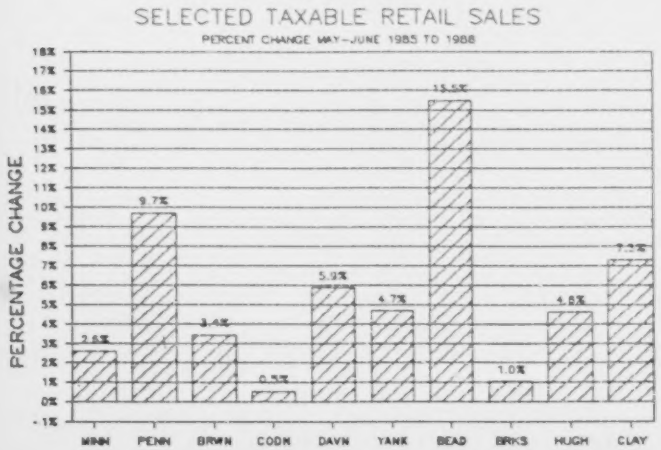
The state's retail sales performance in the May-June bimonthly reporting period is stronger than the national performance for all three reporting levels. The state as a whole experienced growth of 5.4 percent. The top two, next eight and other counties recorded increases of 5.5, 6 and 5.8 percent, respectively. This modest upturn is welcome news. The sale of goods improved significantly and the sale of services remained strong.

Pennington county led the two big counties with an increase of 9.7 percent. Pennington showed strength in the retail trade sectors with the exception of apparel and accessories and furniture. The service sectors did nearly as well with business services bouncing back to double digit growth following five bimonthlies of decline. Minnehaha had an overall growth of 2.6 percent. Minnehaha's sales of goods was more spotty than Pennington's. There was negative performance in the areas of building materials and food store sales. The apparel and accessory and furniture sectors registered larger declines than did the stores in Pennington County.

The next eight counties of the top ten, the top ten less Pennington and Minnehaha, show a general strengthening in the sale of goods. All sectors but food stores and apparel and accessory recorded increases. The decreases in those sectors were small at .4 and 1.1 percent, respectively. Spending in the area of business services has remained strong in this group of counties throughout the first half of this year with growth rates well into the double digits.

The other counties have followed the lead of Pennington and the next eight counties with general growth in the sale of goods. Furniture is the only sector that showed a decline for this bimonthly. Business services have grown by double digits for the past two bimonthly periods.

The national retail sales increased at the rate of 3.8 percent for the July-August bimonthly period. The national index of consumer sentiment for the period increased from 94.8 in May to 97.7 in August.



BIMONTHLY PERIODS	JUL-AUG 1985	SEP-OCT 1985	NOV-DEC 1985	JAN-FEB 1986	MAR-APR 1986	MAY-JUN 1986

A BRIEF COMPARISON OF SOUTH DAKOTA AND UNITED STATES ECONOMIC VARIABLES

Jeff M. Peters

The following graphs show the relationship between SD and US economic variables since 1980. Although the SD economy has experienced a few deviations from the US trend, both economies have followed the same general pattern. South Dakota's non-ag employment fell in 1985, then rose sharply in the first quarter of 1986. The second graph shows that South Dakota's real personal income is quite volatile compared to the US. The rapid decline in SD personal income was reversed in the third quarter of 1985, but dropped again in the first quarter of 1986. The SD unemployment rate rose in 1984 and 1985 while the national rate was falling, but the SD rate showed a significant drop in the first quarter of 1986. Real farm income for the US and SD moved in the same direction throughout 1985 and the beginning of 1986. SD experienced a major low in the third quarter of 1985, recovered rapidly in the fourth quarter, then dropped back to the 1985 third quarter level.

Sept.-Oct.	Nov.-Dec.	3,248,577.11		
Nov.-Dec.	Jan.-Feb.	2,705,832.67		

ABOUT THE TAXABLE SALES REPORTED

Not all sales are included in the reported taxable sales percentage change. The reported performance statistics are meant to provide information about main street businesses in specific counties. Certain retail sales cannot be identified on a county basis and are therefore not included in the reported percentage changes. Public utilities are a good example. Rural electric taxable sales can be identified by county and are included in the county data. In the case of other utilities, such as telephone services and natural gas, the place of purchase cannot be identified and are therefore not included in this report. A second example of sales excluded are out-of-state collections or remittances from businesses in other states. Sales of this nature give little insight into main street business performance and are consequently excluded.

Sales & Use Tax Remittance Comparisons
